password : "ranjana"  
city : "Delhi"  
pincode : 123456  
__v : 0`

\_MONGOSH

The screenshot shows the MongoDB Compass application running on a Mac OS X system. The title bar indicates the version is 1.42.1 and the connection is to 'localhost:27017/Amazon.users'. The left sidebar has a dark green header with the text 'localhost:27017' and a leaf icon. Below it are sections for 'My Queries', 'Performance', and 'Databases'. Under 'Databases', 'Amazon' is selected, and 'users' is the active collection, shown with a green folder icon. The main pane displays the 'Documents' tab for the 'users' collection. It shows a single document with the following fields and values:  
`_id: ObjectId('65faf377dbc1436cf2f748b1')  
name : "Ranjana"  
email : "uccranjana13@gmail.com"  
number : 7901702159  
password : "ranjana"  
city : "Delhi"  
pincode : 123456  
__v : 0`  
Below the document list are buttons for 'ADD DATA', 'EXPORT DATA', 'UPDATE', and 'DELETE'. At the bottom of the main pane, there are navigation controls for '1-1 of 1' and various options like 'Explain', 'Reset', 'Find', and 'Options'. The bottom of the screen shows the Mac OS X dock with icons for various applications.

THANKS  
FOR  
WATCHING

;-)
